

MEMORANDUM

Office of City Manager

TO: Mayor and City Council

FROM: Matthew C. Alexander, City Manager

DATE: December 30th, 2025

RE: Termination of Westchester Power ESA Agreement - CCA

Sustainable Westchester will discontinue the Westchester Power program when the current contract concluded in November. This decision comes as New York implements new rules that govern community energy programs statewide, which impact all Community Choice Aggregation administrators and their energy suppliers.

Sustainable Westchester determined that continuing the program under the current regulatory framework is not feasible. For residents and small businesses within the 26 municipalities served by Westchester Power, there will be no disruption to electric service as power will continue to be supplied safely and reliably by their local utilities, Con Edison and NYSEG. As an alternative, customers may select another Energy Services Company (“ESCO”). A list of currently active suppliers, including suppliers of renewable energy, can be found at the following sites for the Con Edison and NYSEG service territories:
project.

At the Common Council’s direction, a resolution will be prepared for January 12, 2026 Common Council meeting authorizing the City Manager to sign termination letter.
